Information Telephone: (800) 772-3452 Facsimile: (330) 773-1028 Emergency Telephone: (330) 773-8911 CHEMTREC: (703) 527-3887

Product Code: M-1376R1 Product Name: PVC ADHESIVE Product Use: Industrial Not recommended for: Non-Professional Use

Section 2 - Hazards Identification

GHS Ratings

| GHS Ratings | | |
|---------------------------|----------------------|---|
| Flammable liquid | 2 | Flash point < 23°C and initial boiling point > 35°C (95°F) |
| Skin corrosion/irritation | 2 | Reversible adverse effects in dermal tissue, Draize score: >= |
| | | 2.3 < 4.0 or persistent inflammation |
| Serious eye damage/eye | 2A | Eye irritant: Subcategory 2A, Reversible in 21 days |
| irritation | | |
| Reproductive toxicity | 2 | Human or animal evidence possibly with other information |
| GHS Hazards | | |
| H225 | Highly flammable I | liquid and vapour |
| H315 | Causes skin irritati | ion. |
| H319 | Causes serious ey | e irritation. |
| H361 | Suspected of dam | aging fertility or the unborn child. |
| GHS Precautions | | |
| P201 | Obtain special inst | tructions before use. |
| P202 | Do not handle unti | il all safety precautions have been read and understood |
| P210 | Keep away from h | eat/sparks/open flames/hot surfaces. No smoking |
| P233 | Keep container tig | htly closed |
| P240 | Ground/bond cont | ainer and receiving equipment |
| P241 | Use explosion-pro | of electrical/ventilating/light/manufacturer/equipment |
| P242 | Use only non-spar | king tools |
| P243 | Take precautionary | y measures against static discharge |
| P264 | Wash contact area | a thoroughly after handling. |
| P280 | Wear protective gl | oves/protective clothing/eye protection/face protection |
| P281 | Use personal prote | ective equipment as required |
| P321 | Specific treatment | (see supplemental first aid instruction on this label) |
| P362 | Take off contamina | ated clothing and wash before reuse |
| P302+P352 | IF ON SKIN: wash | with plenty of water. |
| P303+P361+P353 | • | ir): Take off Immediately all contaminated clothing. Rinse SKIN |
| | with water [or show | wer]. |
| P305+P351+P338 | | e cautiously with water for several minutes. Remove contact |
| | | nd easy to do - continue rinsing. |
| P308+P313 | | cerned: Get medical advice/attention. |
| P332+P313 | | curs: Get medical advice/attention. |
| P337+P313 | • • | rsists: Get medical advice/attention. |
| P370+P378 | In case of fire: Use | e to extinguish. |
| P405 | Store locked up | |
| P403+P235 | Store in a well-ven | itilated place. Keep cool. |

Signal Word: Danger

Acute Toxicity

N/A

| Section 3 - Composition / Information on Ingredients | | | | |
|--|------------|-----------------|--|--|
| Chemical Name CAS number Weight Concentration | | | | |
| Cyclohexanone | 108-94-1 | 20.00% - 30.00% | | |
| Methyl ethyl ketone | 78-93-3 | 20.00% | | |
| Acetone | 67-64-1 | 10.00% - 20.00% | | |
| Toluene | 108-88-3 | 14.00% | | |
| Diisodecyl phthalate | 26761-40-0 | 5.00% - 10.00% | | |
| Poly(vinyl chloride) | 9002-86-2 | 5.00% - 10.00% | | |
| Quartz | 14808-60-7 | 0.10% - 1.00% | | |

Section 4 - First Aid Measures

INHALATION - Move affected person to fresh air, rest in a half upright position, and loosen clothing. If breathing is difficult, administer oxygen. If breathing has stopped, give artificial respiration. Seek medical advice after significant exposure.

EYE CONTACT - Flush with large amounts of water for at least 15 minutes. Lift eyelids occasionally. Get prompt medical attention.

SKIN - Wash thoroughly with soap and water immediately. Remove all contaminated clothing immediately. Seek medical advice if irritation persists.

INGESTION - Seek medical advice. The decision to induce vomiting or not must be made by a physician after careful consideration of all matterials ingested. Risk of aspiration into lungs.

Section 5 - Fire Fighting Measures

Suitable Extinguishing Media

Carbon Dioxide---Dry Chemical---Foam---Water Fog Use water for cooling material stored in vicinity of fire.

Explosion Hazards

Vapors are heavier than air and may travel along the ground to an ignition source some distance from material

SDS for: M-1376R1

handling point. Ignition sources include pilot lights, smoking, heaters, electric motors, sparks from electrical switches and static discharges.

CAUTION: Never use cutting torch on empty containers! Residual solvent vapor in empty container may explode. Application to hot surfaces requires special precautions. During emergency conditions, overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain Medical Attention.

Hazardous Combustion Products

N/A

Recommended Fire Equipment

Use self-contained breathing apparatus with a full-face piece operated in a pressure-demand or other positive pressure mode. Wear protective clothing.

Section 6 - Accidental Release Measures

Non-emergency personnel: Evacuate and isolate the area and prevent access. Remove ignition sources. No flares, smoking or flames in hazard area. Notify management. Avoid breathing vapor or mist and put on protective equipment. Control source of the leak. Ventilate.

<u>Emergency responders</u>: See section 8 for any specialized clothing recommendations. Also reference the information for non-emergency personnel

Environmental precautions: Prevent further leakage or spillage if possible. Do not allow the material to spread to drains, sewers, water supplies, or soil. Contact APV (**330-773-8911**) for assistance and advice.

Small Spill: Stop leak if possible and move containers from the spill area. Water soluble: dilute with water and mop up. Water Insoluble: Cover spill area with a suitable absorbent inert material (Kitty Litter, Oil-Dri, etc.) and dispose of in an appropriate metal waste container. Dispose of material through a licensed waste disposal contractor.

Large Spill: Stop leak if possible and move containers from the spill area. Approach release from upwind. Contain spillage and with non-combustible absorbent material and place in appropriate disposal container according to local regulations. Dispose of material through a licensed waste disposal contractor. Report spill to appropriate governing agencies if applicable.

APV requires that CHEMTREC be immediately notified (**800-424-9300**) when this product is unintentionally released from its container during its course of distribution, regardless of the amount released. Distribution includes transportation, storage incidental to transportation, loading and unloading. Such notification must be immediate and made by the person have knowledge of the release.

Section 7 - Handling and Storage

Precautions for Safe Handling

Keep away from food, drink and heat. Keep away from sources of ignition. No smoking. Do not breathe vapor. Avoid contact with skin and eyes. Never use pressure to empty. Take precautionary measures against static discharges.

Storage temperature-

| Minimum: | do not freeze |
|----------|---------------|
| Maximum: | 40°C (104°F) |

Storage Period- See technical data sheet.

| Section 8 - Exposure Controls / Personal Protection | | | | | |
|---|---------------------------------|--|---|--|--|
| Chemical Name / CAS No. | OSHA Exposure Limits | ACGIH Exposure Limits | Other Exposure Limits | | |
| Cyclohexanone 108-94-1 | 50 ppm TWA; 200 mg/m3 TWA | 50 ppm STEL 20 ppm TWA | NIOSH: 25 ppm TWA; 100 mg/m3 TWA | | |
| Methyl ethyl ketone 78-93-3 | 200 ppm TWA; 590 mg/m3 TWA | 300 ppm STEL 200 ppm TWA | NIOSH: 200 ppm TWA; 590 mg/m3 TWA 300 ppm STEL; 885 mg/m3 STEL | | |
| Acetone 67-64-1 | 1000 ppm TWA; 2400 mg/m3 TWA | 500 ppm STEL 250 ppm TWA | NIOSH: 250 ppm TWA; 590 mg/m3 TWA | | |
| Toluene 108-88-3 | 200 ppm TWA | 20 ppm TWA | NIOSH: 100 ppm TWA; 375 mg/m3 TWA 150 ppm STEL; 560 mg/m3 STEL | | |
| Diisodecyl phthalate 26761-40-0 | N/A | N/A | N/A | | |
| Poly(vinyl chloride) 9002-86-2 | N/A | 1 mg/m3 TWA (respirable fraction) | N/A | | |
| Quartz 14808-60-7 | Not Established | 0.025 mg/m3 TWA (respirable fraction) | NIOSH: 0.05 mg/m3 TWA (respirable dust) | | |

Engineering Controls: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation, or other controls to keep air containment concentration below current applicable OSHA permissible exposure limit or ACGIH TLV limit, and volatiles below lower explosive limit. Heavy solvent vapors should be removed from the lower levels of area, and all ignition sources (non-explosion proof equipment) should be eliminated if flammable mixtures will be encountered. Remove decomposition products formed during welding or flame cutting of surfaces coated with this product. For baking finishes - vent vapors emitted on heating.

Environmental Controls: Emissions should comply with environmental protection legislation.

Individual Protection Measures:

<u>Hygiene measures</u>- Wash hands, forearms, etc. after handling chemical products, before eating, smoking, and using the lavatory, and the end of the work period. Use appropriate techniques when removing potentially contaminated clothing and wash before reusing. Know the locations of eyewash and safety showers.

<u>Respiratory Protection</u>- Provide adequate ventilation to keep exposure below permissible limits. If a risk assessment deems necessary, operator is to use a properly fitted, air purifying or supplied air respirator. Respirator selection must be based on known/ anticipated exposure levels, the hazards of the product, and the safe working limits of the respirator.

<u>Skin and Body Protection</u>- Wear chemical resistant gloves (nitrile) and paint suits when necessary, based on risk assessment. The most suitable glove must be chosen in consultation with the gloves supplier who can inform about the breakthrough time of the glove material. PPE for the body should be selected based on the risks of the task being performed and approved by a specialist. Appropriate footwear should also be approved.

<u>Eye/Face Protection</u>- Wear approved chemical safety goggles where exposure to vapor or contact with eyes is possible. Eye wash stations should also be made available. If inhalation hazard exists, a risk assessment will

Section 9 - Physical and Chemical Properties

Section 13 - Disposal Considerations

Dispose of in accordance with federal, state and local regulations. Controlled incineration is recommended for disposal of unused product. Prevent contamination of soil, drains and surface waters. Dispose of large containers to a licensed reconditioner. Dispose of small containers in compliance with local regulations.

Section 16 - Other Information

NFPA and HMIS use a numbering scale ranging from 0 to 4 to indicate the degree of hazard. A value of zero means that the substance possesses essentially no hazard; a rating of four indicates extreme danger. Although similar, the two rating systems are intended for different purposes, and use different criteria. The NFPA system was developed to provide an on-the-spot alert to the hazards of a material, and their severity, to emergency responders. The HMIS system was designed to communicate workplace hazard information to employees who handle hazardous chemicals.

Hazardous Material Information System (HMIS)
